## Report on Python Programming for the academic Year 2022-2023

Program Name- Python Programming

Resource Agency: iAmbition Inc.

Python is an interpreted, object-oriented, high-level programming language with dynamic semantics. Its high-level built in data structures, combined with dynamic typing and dynamic binding; make it very attractive for Rapid Application Development, as well as for use as a scripting or glue language to connect existing components together.

This course covers following topics

- **Core Python Syllabus**
- Introduction of Python
- Data-types in Python
- Installing Python IDEs - Python IDLE and Anaconda
- Typecasting in Python
- Python Collections: List, Tuple, Sets and Dictionary
- Loops in Python: For Loop, While Loop and Nested Loops
- Importing Modules: Maths Module
